

Group Action for UK Healthcare Sector.

If you are facing losing your job for being unjabbed or by virtue of your work in hospital/s or because CQC regulated or because your employer is following propaganda/guidance re medical, medical settings and/or frontline staff, we want to hear from you in a questionnaire.

It doesn't matter if you are employed, self employed, a student at uni losing place to study, everyone can be involved. The lawyers are looking at group actions to cover different groups of people facing slightly different situations due to the nature of their contract / no contract / letters received. Some people have even been sacked already. You don't need to have received a letter yet, if you know it's coming is enough.

This group does not want to exclude anybody for potential group actions (and will not do so even on means / financial basis because EVERYONE deserves access to justice).

This is about **standing together**.

Grouping into categories that open legal remedies for all.

Power in numbers.
